Keynote Presentation

Duco Sickinghe, CEO

At the heart of
your digital lifestyle.

Investor & Analyst Conference 2008

Mechelen, Belgium
May 13, 2008

Agenda – Keynote

MORNING SESSION

1. Our Company
2. Broadband internet
3. Telephony
4. Digital TV
5. Packs – bringing it all together
6. Telenet Solutions
7. Marketing, sales & care

AFTERNOON SESSION

8. Our vision on mobile
9. Operational long-term projections & Strategy

Part 1

Our company

A fast evolving company

We started with broadband and telephony

BB Internet

1996

Telephony

Aug 1997

Analogue TV

Aug 2002

PRIME

PayTV

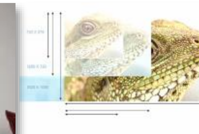
Dec 2003

Launch iDTV

Sep 2005

Telenet Mobile

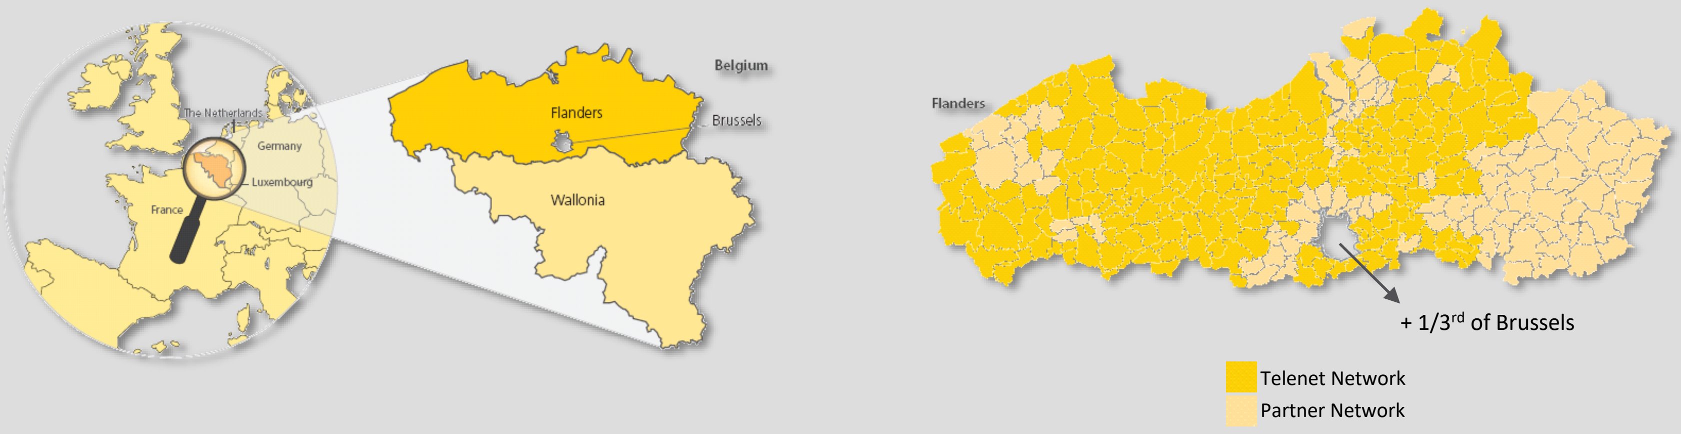
Aug 2006



HDTV & Hosting

Dec 2007

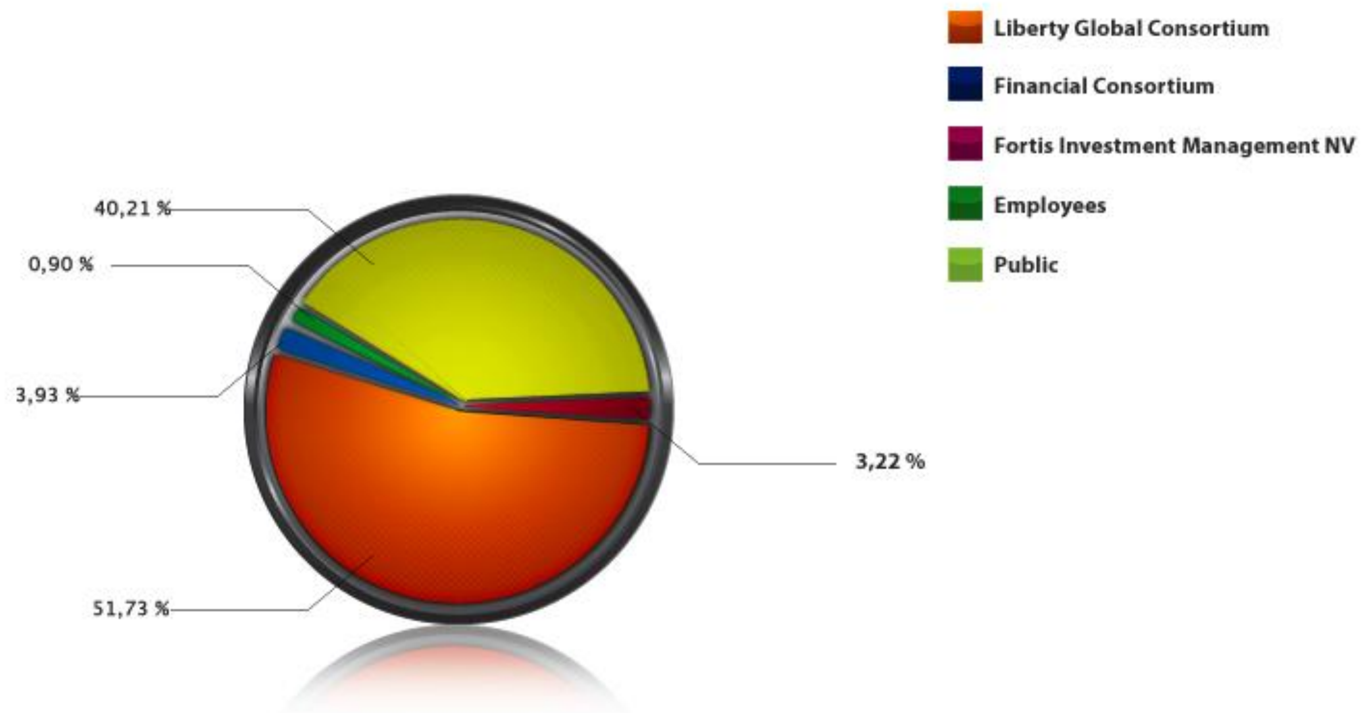
Our footprint



- Our footprint equals Flanders region
- One language = characteristics of national market
- 2.8 million homes passed for broadband, telephony and mobile (= 55% of Belgium)
- 1.9 million homes passed for analog and digital television (= 38% of Belgium)

Our shareholders

telenet



- Listed on Euronext Brussels (TNET)
- Average daily volume: 273,608
- Market cap: 1.7bn EUR

Strong brand image

High-visibility campaigns

Brand presence

Leading individual products

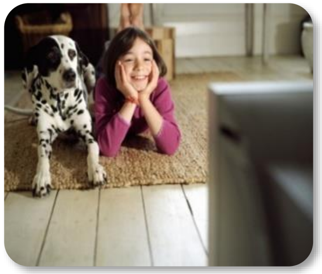
Internet
Broadband

- Strong market position
- Speed leadership versus DSL

Telephony
Fixed & Mobile

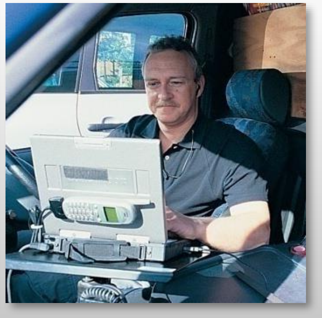
- Transparent and competitive flat fee rate plans
- Combined portfolio of fixed and mobile

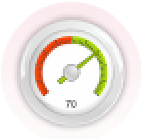
Television
Analog & Digital

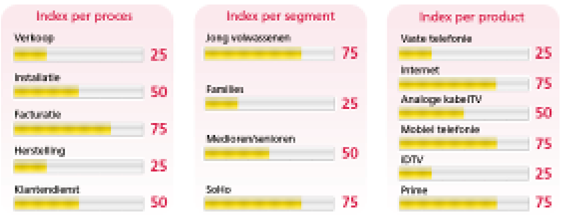


- Superior and innovative product with unique set of features, content and image quality

Care about our customers







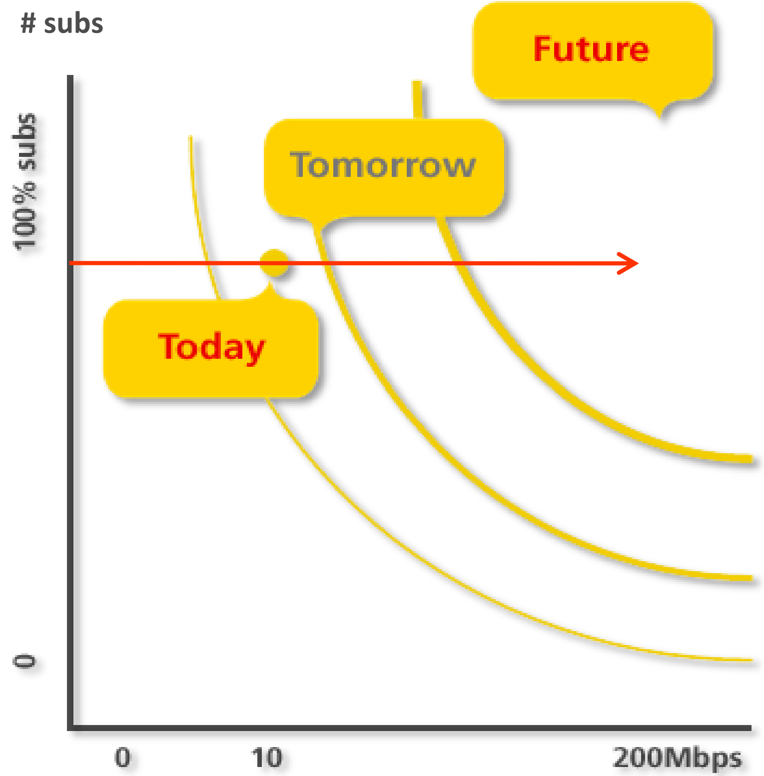
100+ managers receive their annual incentive based on: **40% customer satisfaction**, 40% operational performance and 20% managerial skills

Process-oriented organization

- **Six sigma**
- **End-to-end responsibility**
- **Core process-driven organization versus vertical**

Technological innovation and standards

- **Telenet wide-band**
  (EuroDocsis 1.0 > 2.0 > 3.0)
- **Voice over IP**
- **DVB and MHP**
  later adopted by the US cable as True2Way
- **Telenet constructed and further develops the information highway:**
  - **> €1 billion in the Telenet network development**
  - **> €50 million in research & development of iDTV**
  - **> €4 million in research & development of WiFi**



People and culture

- ‘Best people on the bus’
- Balanced remuneration (customer satisfaction versus cash flow)
- Telenet growth generates employment:
  - 1,600+ employees directly
  - 1,000+ employees indirectly (subcontractors, call centers,…)

Flanders' topology offers the best opportunities for cable

Country	% cable penetration	% homes passed
Flanders	90%	98%
Netherlands	80%	96%
Germany	45%	70%
UK	20%	55%
France	15%	35%

Source: internal regulatory analysis

Outperforming the telecom sector

Item	Telenet	European Telecoms Sector
Revenue CAGR (2005 – 2010 cons)	**10%**	**5%**
EBITDA CAGR (2005 – 2010 cons)	**10%**	**4%**
EBITDA margin (2007)	**48%**	**33%**
Operating FCF CAGR (2005 – 2010 cons)	**17%**	**6%**
Operating FCF vs revenue (2007)	**25%**	**18%**

Broadband internet performance

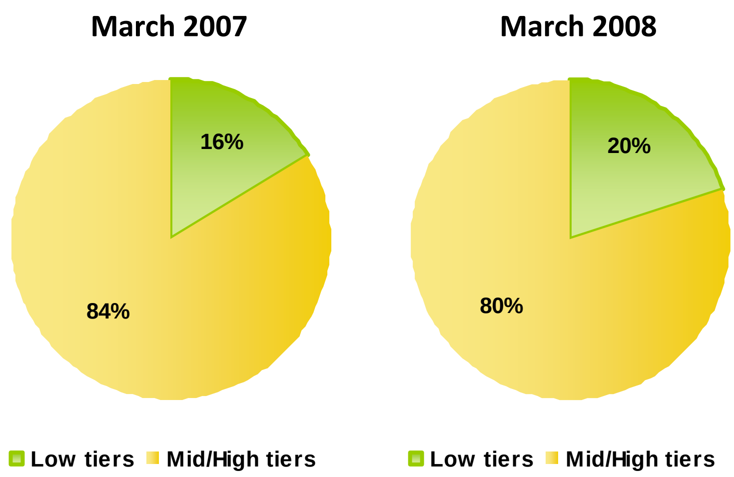
Majority subscribes to >10MBps products

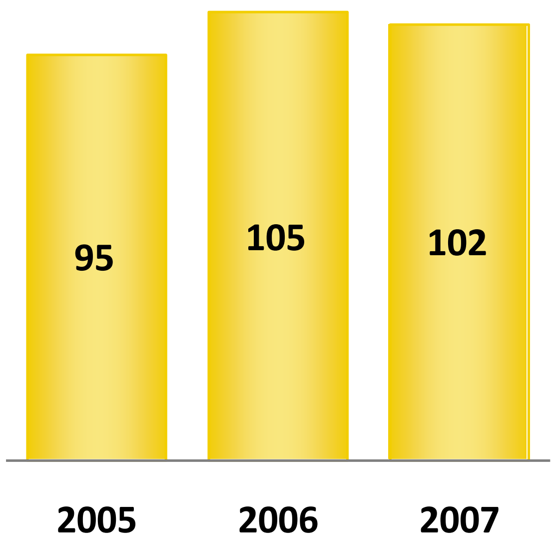
Product tiers Q4 2007 (%)



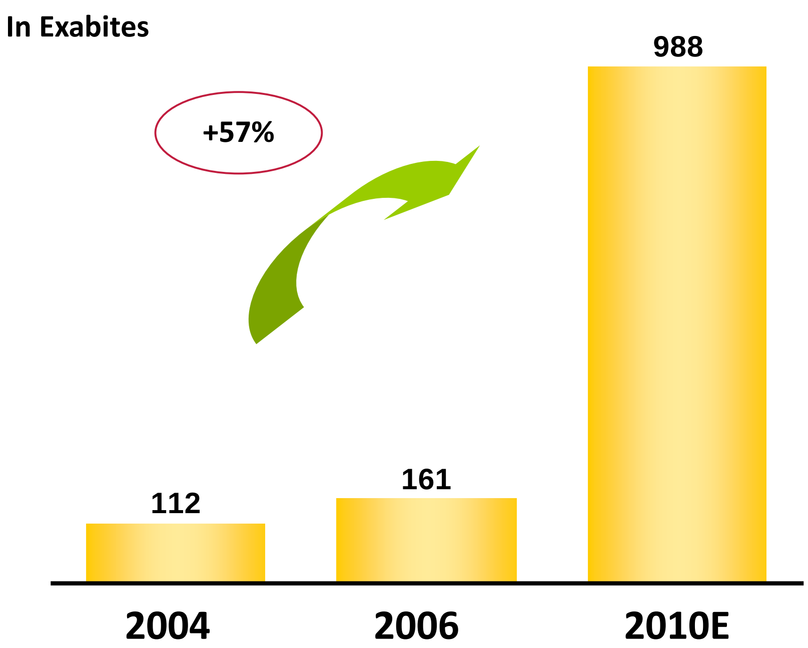
Mid/High: >10 MBps

Low: <10 MBps

Net additions – annual (000)



The internet is in real expansion



- 70% of bits created by 2010 will be by consumers
- The rise of Web 2.0 technologies facilitates participation, creation and sharing, e.g. Blogs, Social networks, Sharing, Podcast, RSS
- 71% of all content on peer-to-peer networks is video

Source: McKinsey & Company

The digital economy is driven by three factors

New devices +18%

- 500 million internet modems of which 60% on broadband
- >3 bn mobile phones
- 175 million Digital TV sold
- >1 bn PC's

Performance +22%

- Processing power doubles every year
- Ability to store and share information doubles every year

Internet +60%

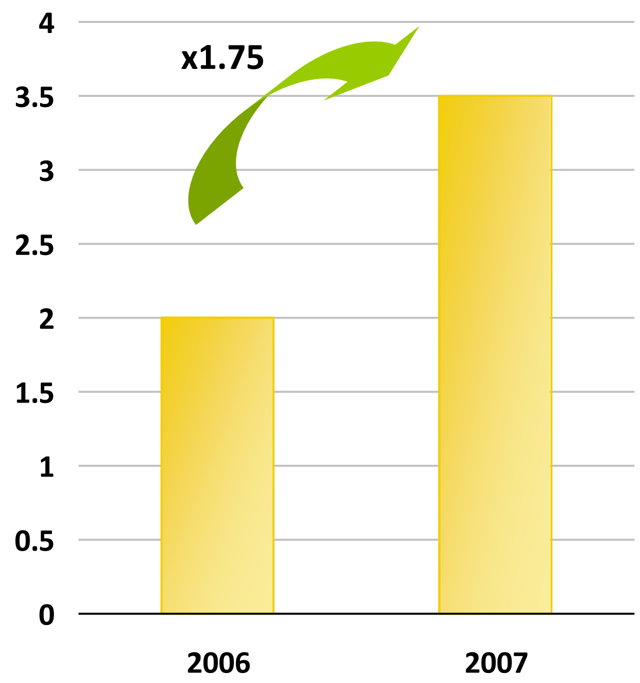
- Globally, 10% of population converts to broadband a year
- Mailboxes have increased from 250 million in 1998 to >1.6 billion today
- Key drivers include video, virtual worlds and web 2.0 technologies

Source: McKinsey & Company

Telenet will proactively adjust its products to meet customer's demand

telenet

Average monthly volume (GB per user)



Changing habits require increasing bandwidth

Video
Broadcast yourself

Broadband internet strategy

telenet

Sustain product leadership

- Sustain speed leadership over DSL
- Follow the customer's needs
- Gradually increase speed and volume

Stimulate Market development

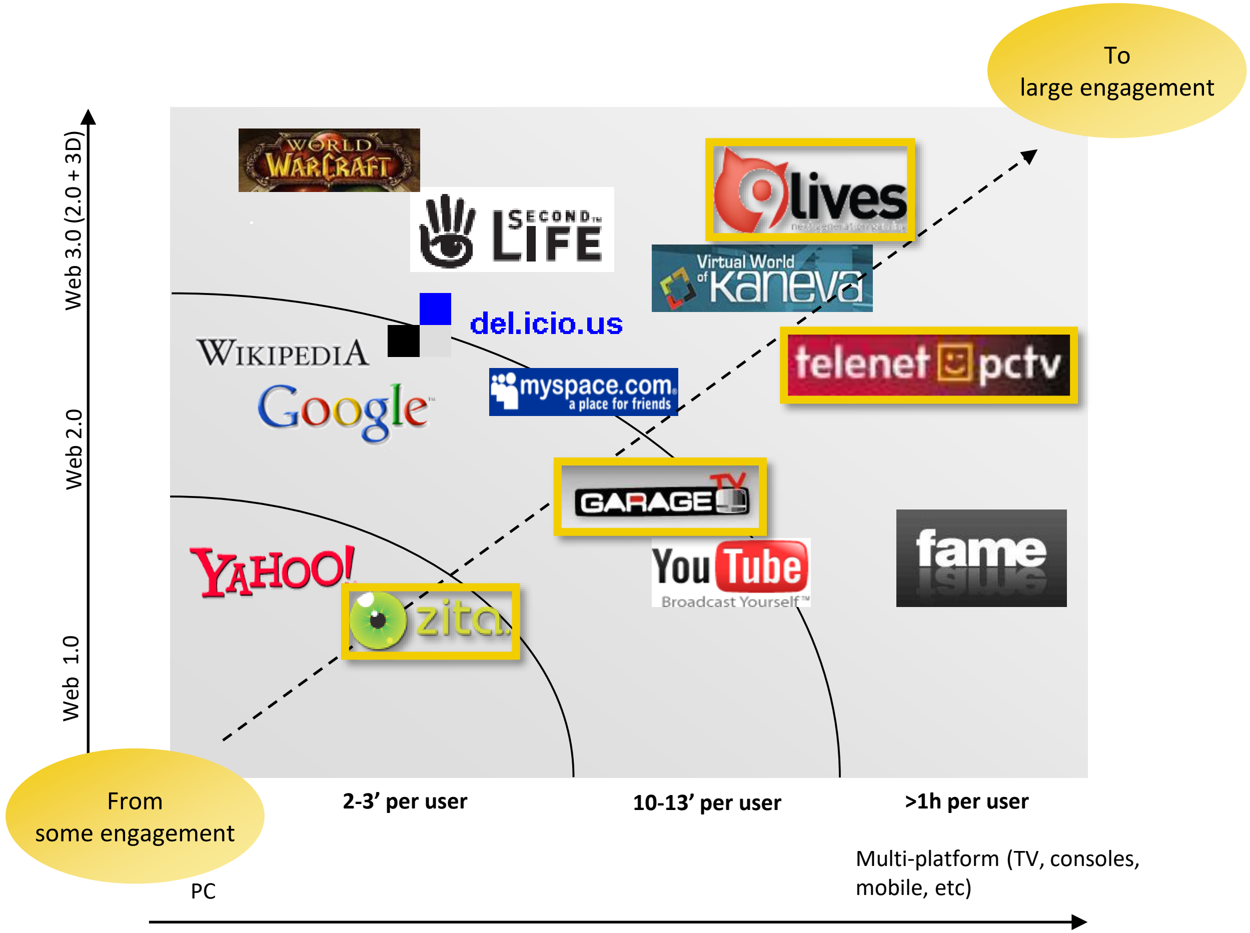
- Integrated in-home equipment
- Move up the broadband value chain with next generation Docsis
- Stimulate PC-independent broadband services
- Upgrade current GPRS datacard to HSDPA standards

Improve customer satisfaction

- Improve value-added-services: anti-spam, Internet Security Pack, hosting
- Link feedback from market research with future development

Internet “over the top”: we have a wide presence on the web

telenet



Our online media portfolio

telenet

Zita

- n° 2 portal in Flanders
- 3.5 million unique visitors per month
- Open: widget concept enables surfers to put any content they want

GarageTV

- First Belgian video sharing site
- 1 million unique visitors per month
- Over 70 million videos viewed since launch

9lives

- n°1 games community
- 0.4 million unique visitors per month
- Start-up of online gaming TV this year

Part 3

Telephony

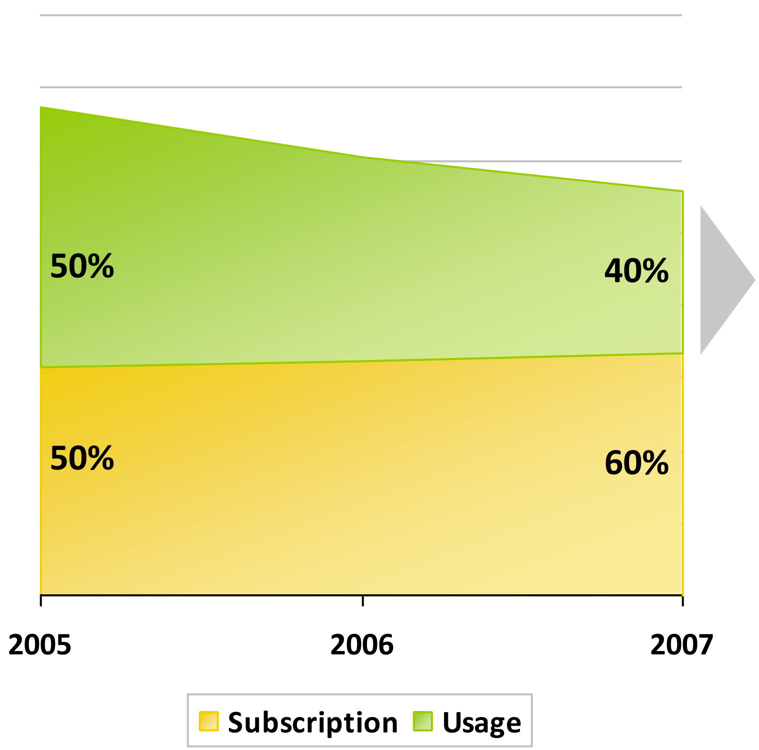
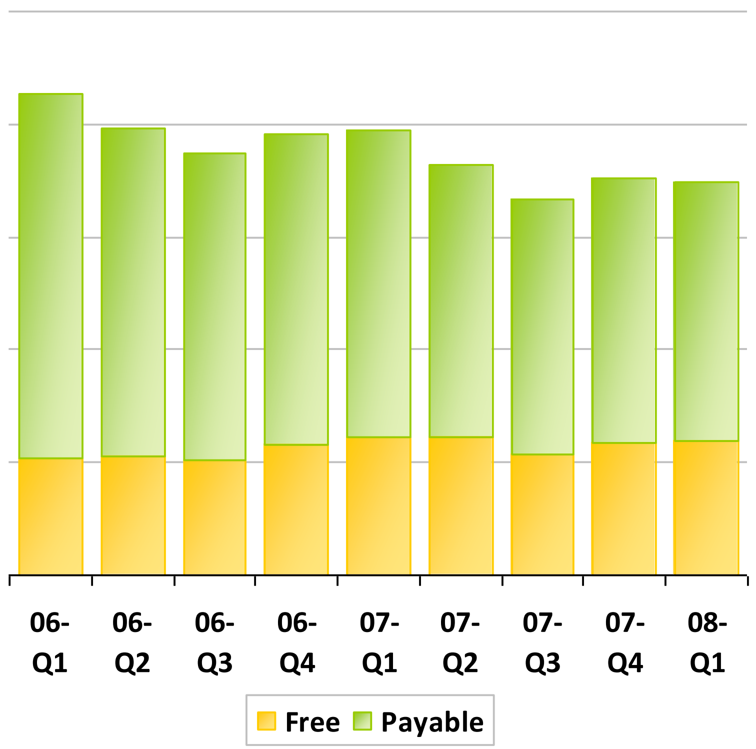
ARPU components (EUR)



Traffic (minutes per subscriber)



Telephony strategy

telenet

Increase market share

- Cross sell with Broadband & DTV
- Segmented focus on families, mediors & seniors

Counter fixed to mobile substitution

- Innovative rate plan concepts
- Fixed mobile convergence: bundle fixed and mobile telephony

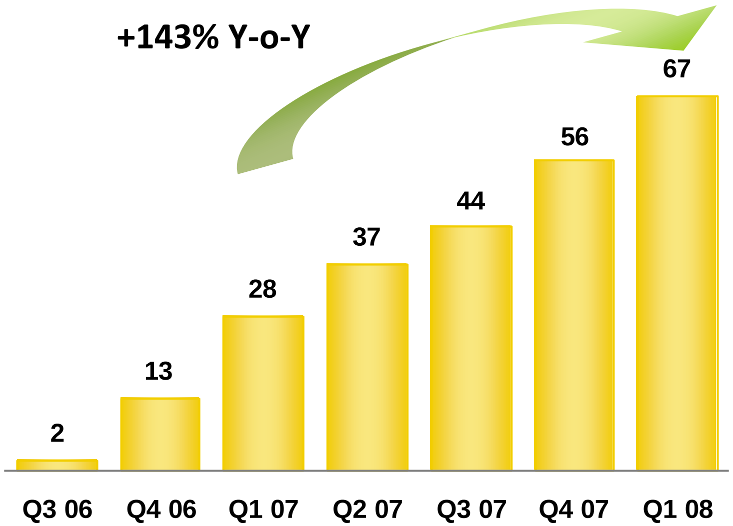
Improve customer satisfaction

- Continuous improvement of line quality
- Focus on in-home equipment

Mobile telephony

Prepaid characteristics at benefits of postpaid

Subscriber base (000)



Telenet Mobile

OUR CURRENT PROPOSITION

- "Only pay for usage when subscribing to other products"

OUR MVNO PROPOSITION & STRATEGY

- Sustainable margin
- Flexible in an ever evolving market
- Ability to build a full product portfolio

Mobile telephony strategy

telenet

Gain a fair share of the mobile market

- Cross sell mobile on install base
- Build a full mobile portfolio to cover all market segments
- Bundle mobile with Broadband, telephony and TV

Exploit mobile internet opportunity

- Bundle mobile and fixed broadband
- Leverage on market leadership in fixed broadband
- Increase number of tariff plans

Improve customer satisfaction

- Improve activation & number port process

Part 4

- Play Along & voting
- Digitext & walled garden
- Gaming

The platform as a way to innovate

telenet

Conditional access to “On Demand”

“Red button”

Interactive advertising

Over the top applications

Currently 23 applications on our DTV platform

Innovator in hybrid models

telenet

Movies on your PC

HD Video sharing

Photo sharing on your TV

Television strategy

telenet

Sustain product leadership

- Achieve superior TV product performance
- Foster key values in digital TV: content, quality
- Price positioning is best guarantee against competition of new platforms

Stimulate Market development

- Educate customers about new features of DTV: on-demand, interactivity

Improve customer satisfaction

- Continue to build on new services
- Sustain a stable platform
- Push down set top box cost through rental
- Support complex installations

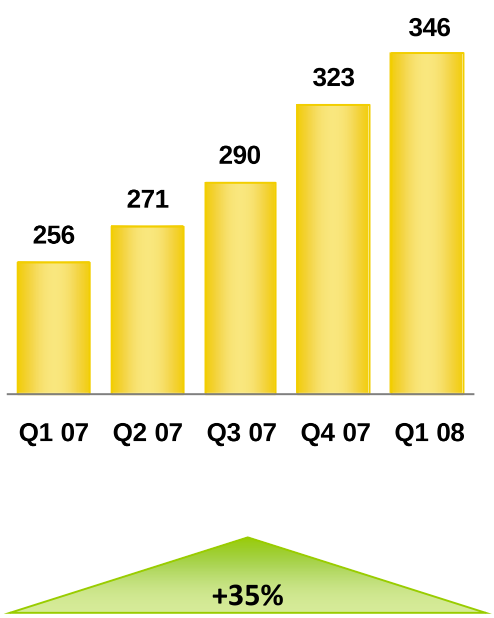
Part 5

Packs – bringing it all together

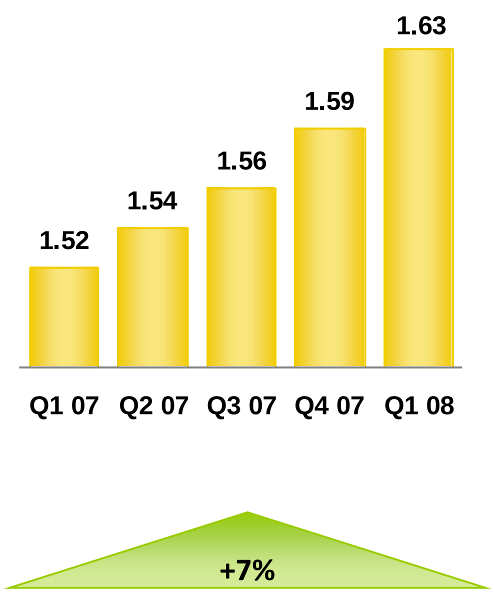
Triple play

Compelling bundled offerings drive triple play

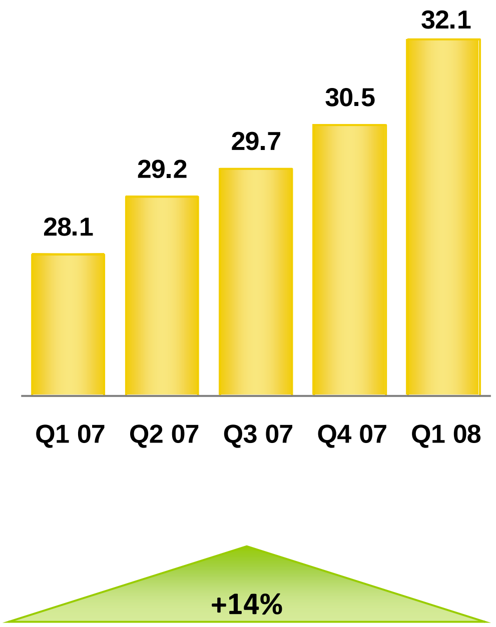
Triple play customers (000)*



Services / Unique customer*



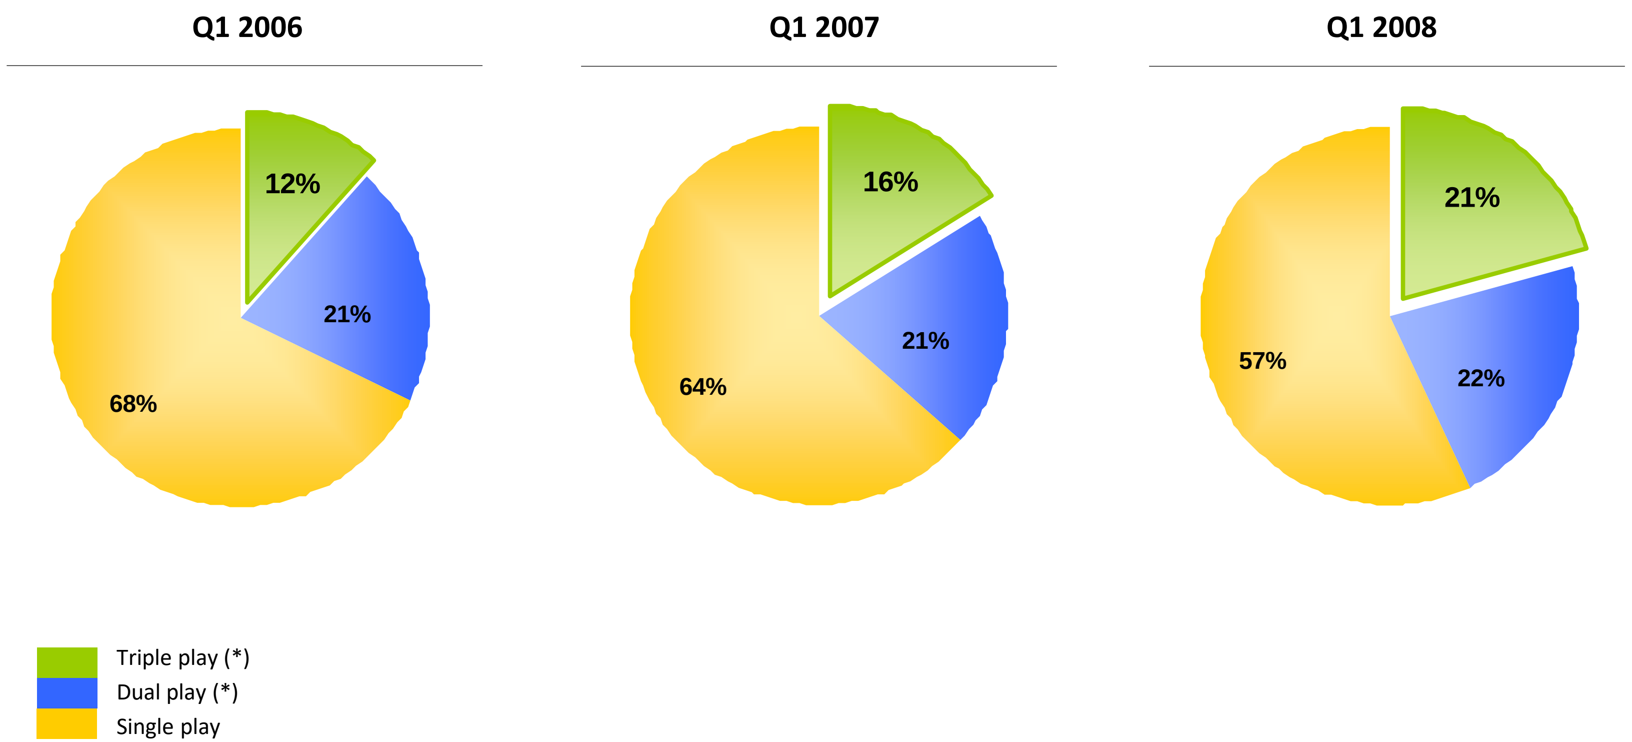
ARPU / Unique customer*



* Numbers relate to customers on the Telenet Network, includes CaTV, internet and telephony services

Triple play

43% of customer base enjoying multiple services



* Triple play is defined as TV, Internet and telephony. Dual play is defined as any two of the three products.

Compelling triple play bundled offerings

Broadband Internet		Fixed Telephony		iDTV		Total Stand-alone		Pack
BasicNet (1MBps) € 20.00	+	FreePhone (unlimited off-peak) € 17.34	+	Rental (Digibox) € 4.00	=	€ 41.34	- 18 %	€ 34.00
ComfortNet (4MBps) € 30.64	+	FreePhone (unlimited off-peak) € 17.34	+	Rental (Digibox) € 4.00	=	€ 51.98	- 15 %	€ 44.00
ExpressNet (10MBps) € 42.91	+	FreePhone (unlimited off-peak) € 17.34	+	Rental (Digibox) € 4.00	=	€ 64.24	- 16 %	€ 54.00

OTHER BENEFITS

- Lower cost
- Integrated ways of communications
- Integrated IP technology
- Convenience

Triple play pack comparison

iDTV + Internet + Telephony (incl. CaTV & HD box)

telenet

	Telenet	Belgacom	Telenet	Belgacom
Internet DS in Mbps	4	2	10	4
Internet Volume in GB	2	1	12	12
Telephony	v	if I-Talk €-2.50	v	if I-Talk €-2.50

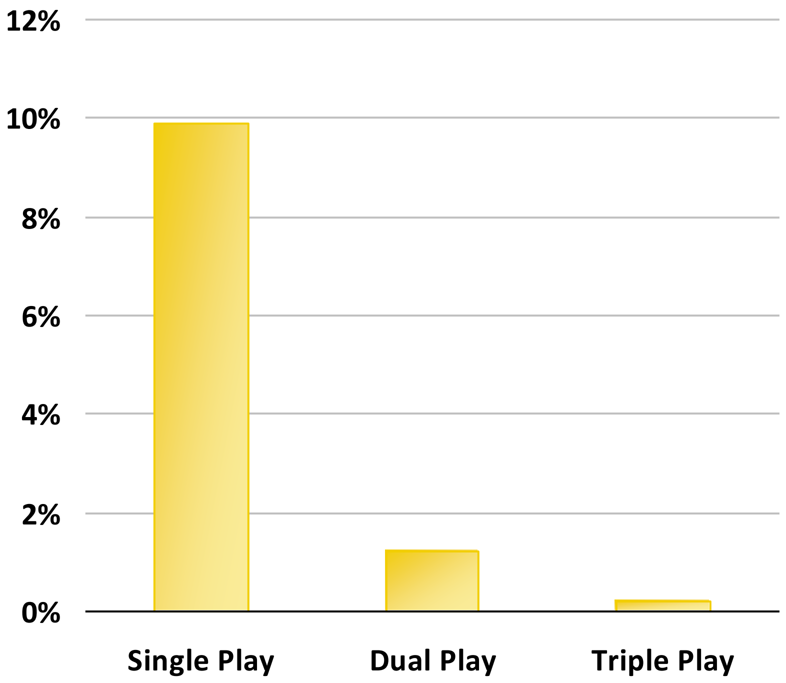
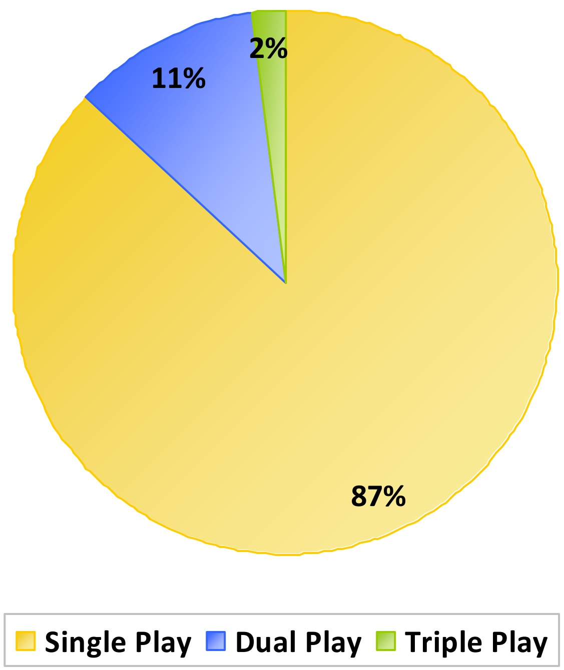
Multiple play significantly reduces churn

telenet

Unique customer churn per # products Q1 2008 (% ann'd)*

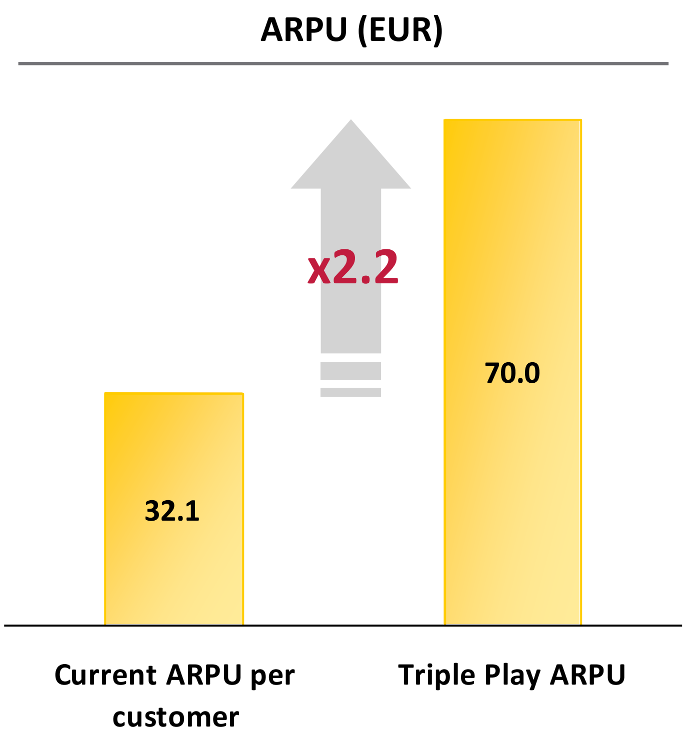


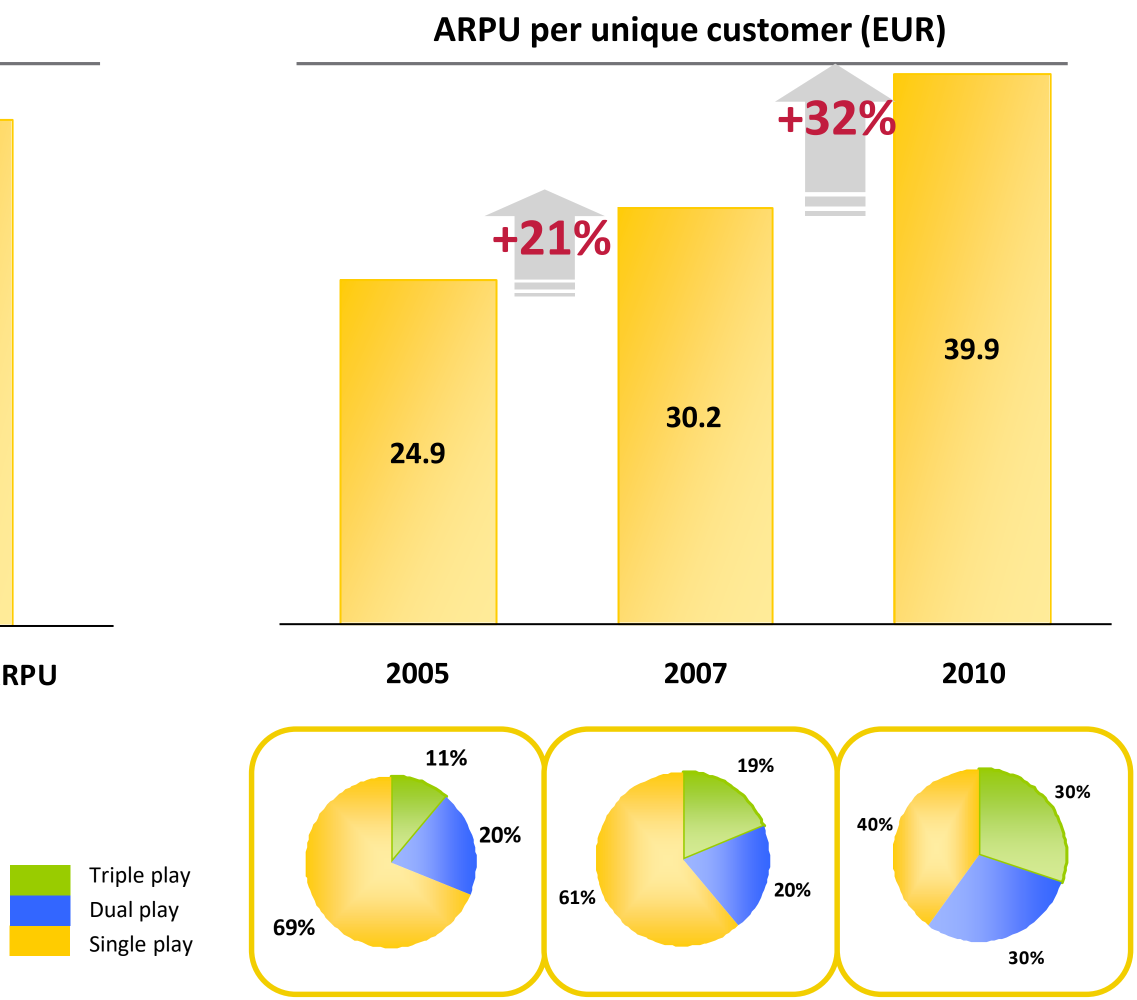
Total unique customer churn Q1 2008 (%)



* Also includes churn as a result of customers moving

Multiple play has considerable revenue upside potential per customer



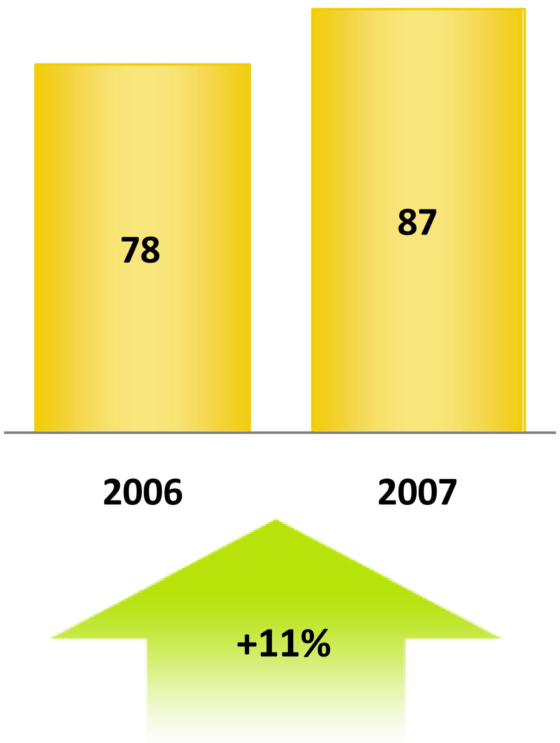


Part 6

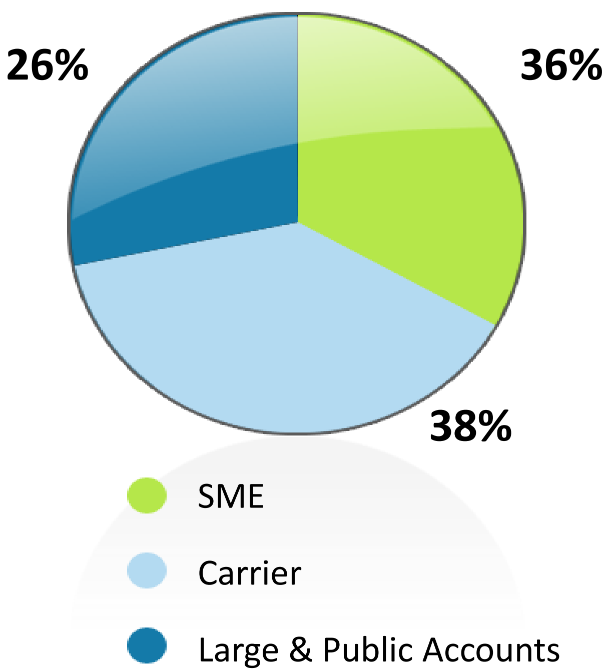
Telenet Solutions

Business services growth ahead of industry, fueled by diversified segments

Revenue (Mio EUR)



Market segments (%)



Segmented approach

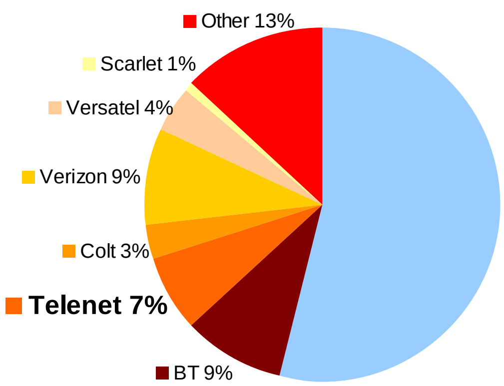
Focus on two main segments, aligned with product take-up and customer needs

	Customers	Key products	
High business segment	▪ Large to medium enterprises and public accounts	1. Data (VPN, leased lines) 2. Fiber internet & voice 3. Coax & DSL internet & voice	▪ Account and service management ▪ Individual employee services
Low business segment	▪ Small to medium enterprises and SOHO’s	1. Coax internet, TV & voice 2. DSL internet & voice	▪ Bundles ▪ Micro campaigns ▪ Proximity ▪ Differentiated service

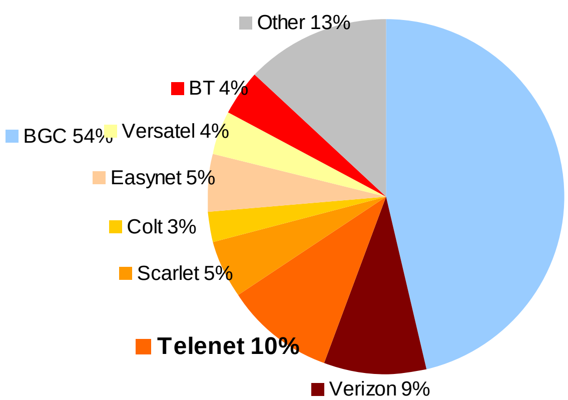
Market shares 2007

Medium and Large Enterprises

Data products



Internet



Fixed voice

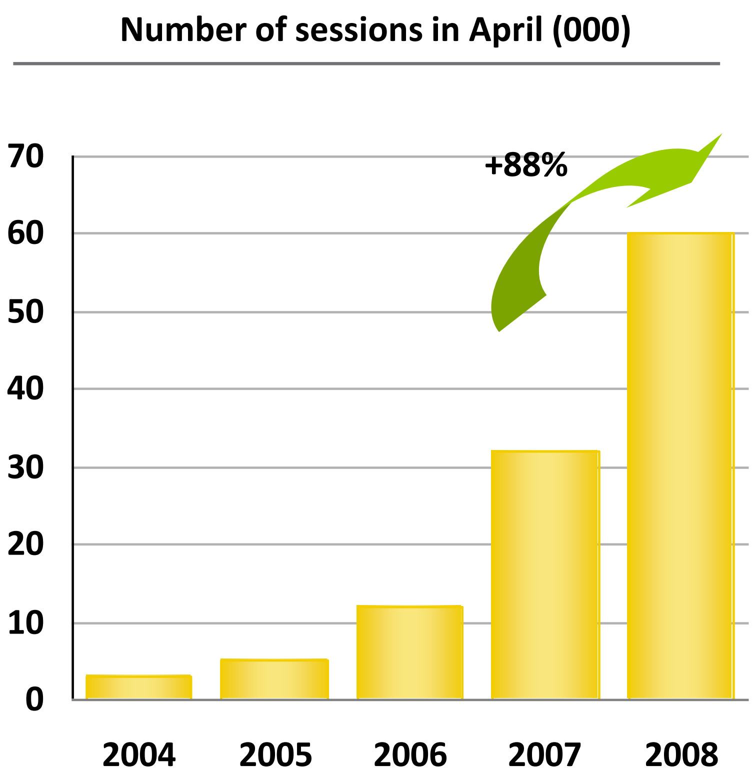
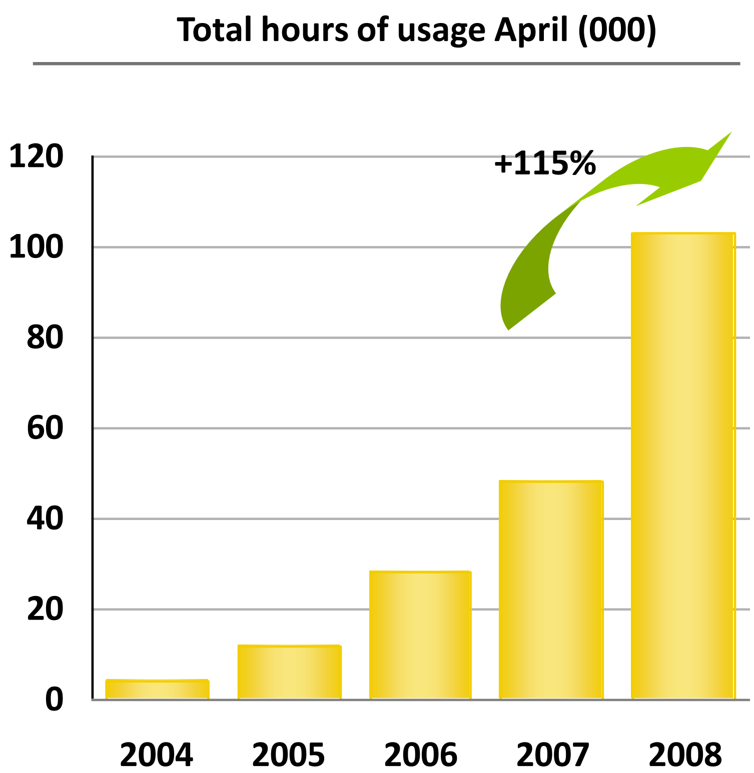
Telenet Hotspot: usage doubles

telenet





Now >1300 hotspots active

Strategy focuses on business users top locations

telenet

Our new WiFi top location: Brussels Airport

- Top location in mobility segment
- Exclusivity contract till September 2010
- 100% coverage of all public areas at the airport
- About 4,000 unique users per month
- Using the hotspot for about 5,700 hours per month

Part 7

Marketing, sales and care

The changing market environment

telenet

Customer behavior trends

- Changes in sales approach will impact sales: people decide faster
- Market driven by positive brand experience
- Important shift in touchpoint complexity and preferences

Competition trends

- Aggressive comparative advertising
- ADSL and fixed telephony have been unbundled
- More synergies between Belgacom and Proximus
- Swifter reactions to Telenet actions
- Focus on digital TV and internet

Our responses

telenet

Customer behavior trends

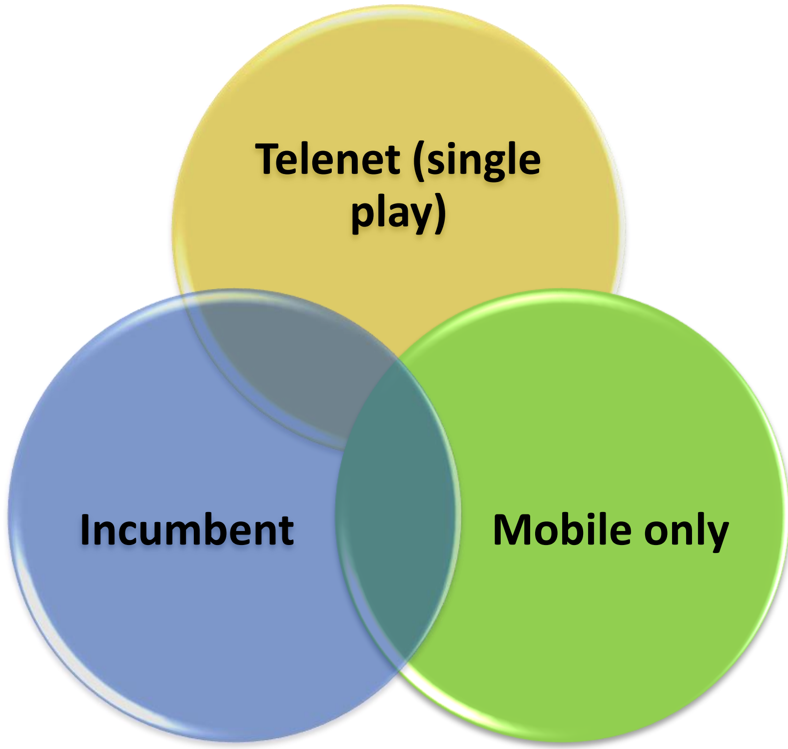
Competition trends

- Rebalance from above the line marketing towards experience and online marketing
- Increased segmentation and micro-segmentation
- Better customer lifecycle management
- Focus on content and on-top revenues
- Build brand and product preference
- Cross-sell on our TV-only customer base

Our customer growth targets

Cross-sell

Acquisition



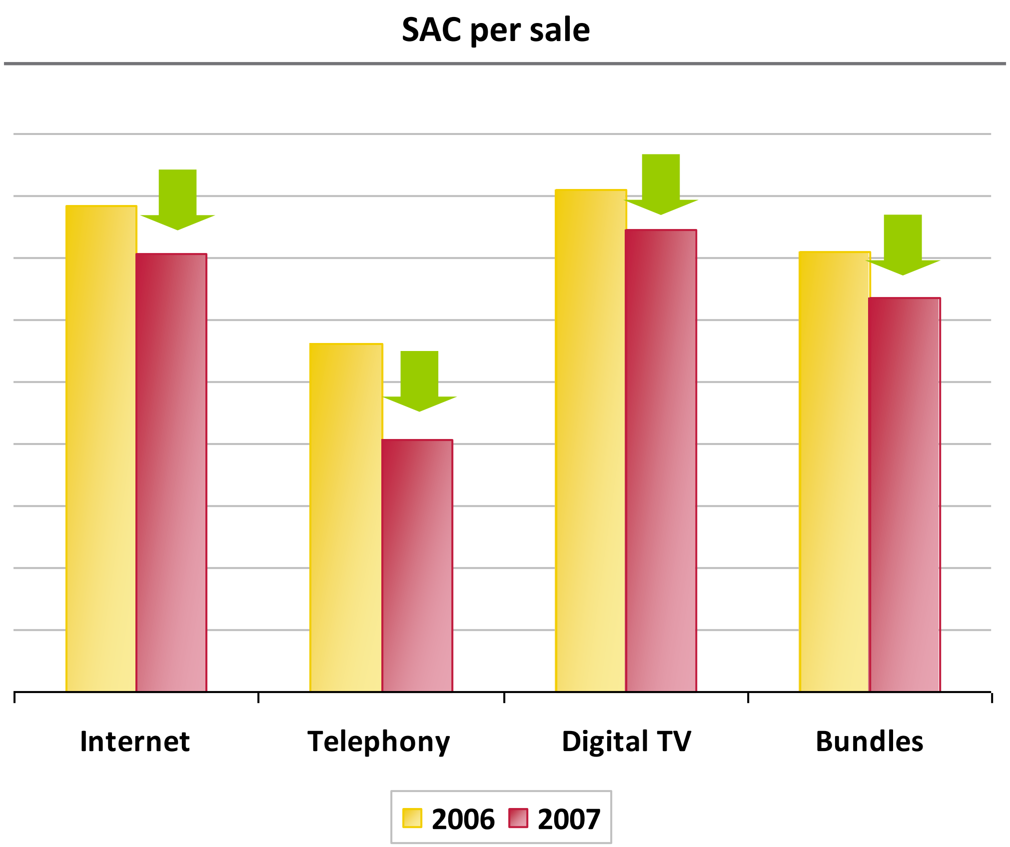
+ MARKET GROWTH

How ?

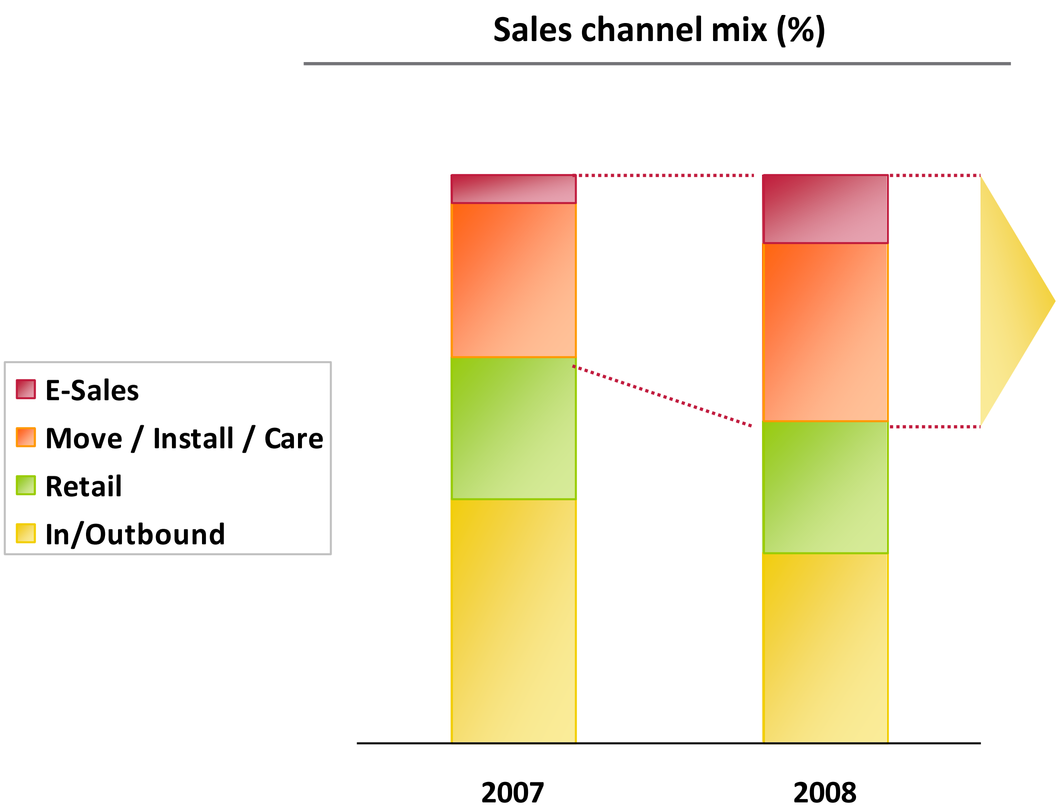
- Renewed marketing plan
- Micro-segmentation
- Optimized campaign flow

Managing acquisition costs…

telenet

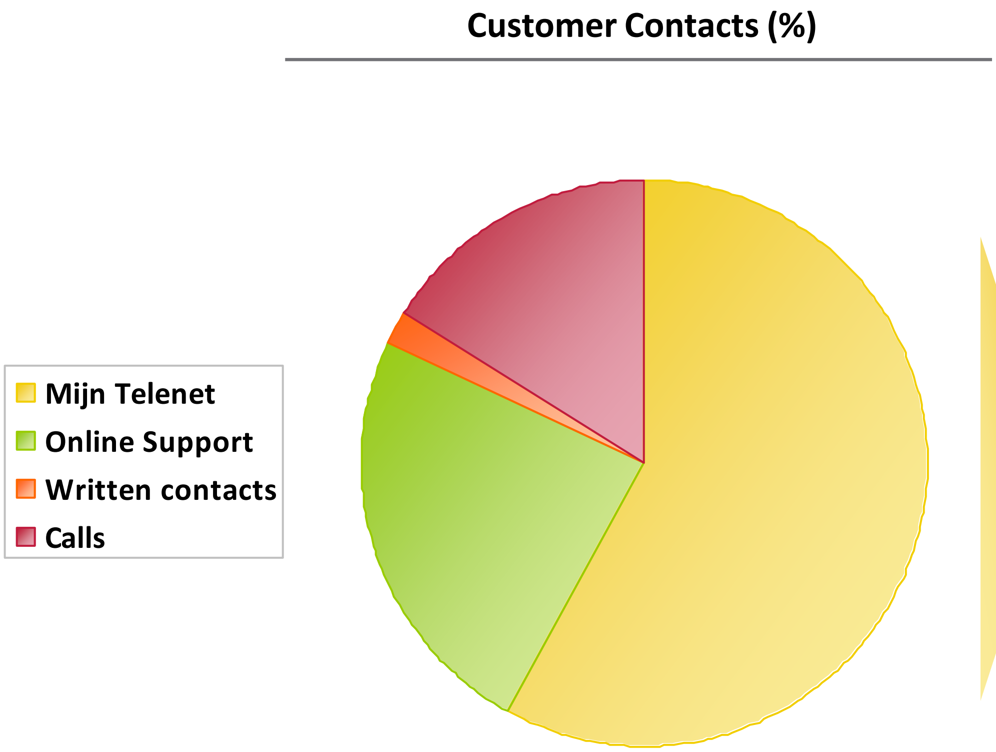


…by moving to more cost efficient sales channels



Cost-efficient channels represent more than 43% of total sales

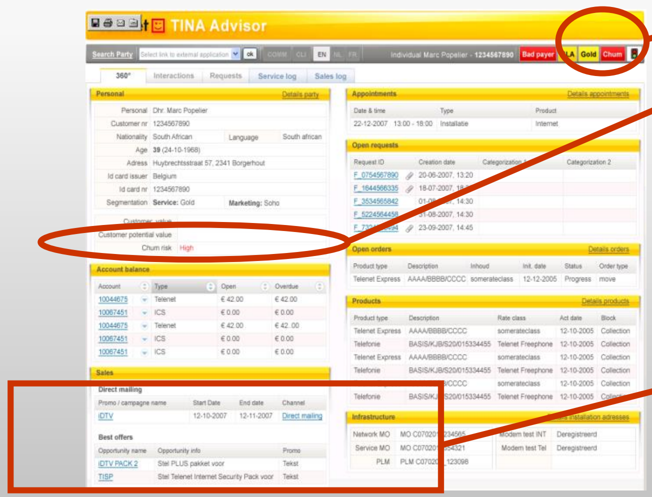
Customer care enhancing usage of cost efficient service channels



Cheapest Service Channels represent more than 80% of total Service Contacts

New customer advisor portal

Provides 360° customer view and next best advice



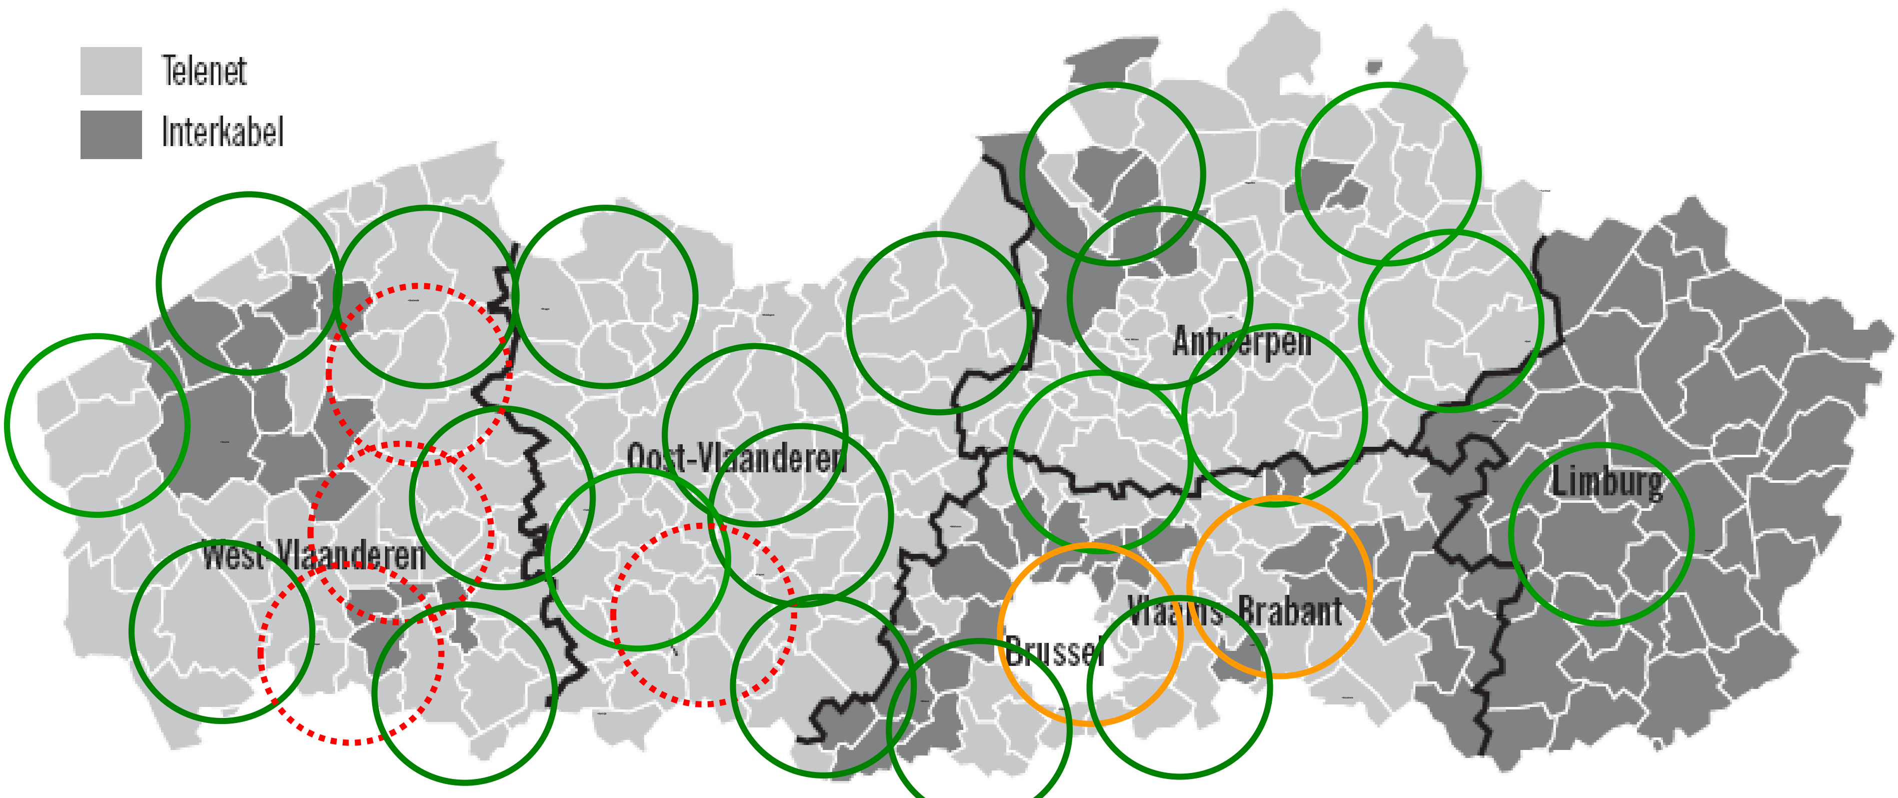
1) Churn Propensity

2) Best offer proposed by tool includes retention offers

Telenet Centers

Decentralization of care optimizes cost of service

telenet



- Telenet shop (2)
- Dealer TC (21)
- Passive TC (4)

Part 8

Our vision on mobile

Market evolution drives the need to increase focus on mobile

Fixed Mobile Bundling

Fixed Mobile Substitution

Fixed Mobile Convergence

The different mobile cooperative models

	Network			Services	Rating & Billing		Helpdesk	Brand & Sales	
MNO	Radio Access	Network Routing	Network Functionality	Applications and Services	Customer-activation	Billing	Customer Care	Marketing	Sales and Distribution
Full MVNO	Radio Access	Network Routing	Network Functionality	Applications and Services	Customer-activation	Billing	Customer Care	Marketing	Sales and Distribution
IN-MVNO	Radio Access	Network Routing	Network Functionality	Applications and Services	Customer-activation	Billing	Customer Care	Marketing	Sales and Distribution
MVNO light	Radio Access	Network Routing	Network Functionality	Applications and Services	Customer-activation	Billing	Customer Care	Marketing	Sales and Distribution
Branded Reseller	Radio Access	Network Routing	Network Functionality	Applications and Services	Customer-activation	Billing	Customer Care	Marketing	Sales and Distribution

Serviced by mobile operator

Current MVNO deal is limited in scope to face fixed-to-mobile future

- **What do we have ?**
  - Mobile virtual network operator
  - GPRS Datacard

- **What do we not have ?**
  - Mobile portal
  - Fixed-to-Mobile convergence
  - Equipment

From current MVNO to extensive partnership with a mobile operator ?

telenet

- Mobile network operators are faced with exponentially increasing costs as 3G/3.5G/4G mobile data and mobile TV traffic take off
- Future mobile networks will require a lot of fixed-line capacity to base stations and content and portal expertise
- Opportunity for Telenet to enter a win-win partnership with a mobile operator, pushing towards full MVNO
- Telenet is currently actively exploring this partnership opportunity with interested mobile operators

If partnership fails to materialize, is the 4th 3G license an option ?

telenet

- 4th 3G license still available in Belgium
- Leverage our strong presence in the fixed market and our successful multi-play strategy
- Use femtocell technology for in-home coverage
- Research & Development project and trial started
- 4th 3G operator investment analysis points to a peak cash flow requirement between €150 – 175 million

Considering the strategic options

telenet

PARTNER Win-Win Partnership with a Mobile Operator	BUILD Stand alone build of a New Mobile Operator
▪ Fast time to market ▪ No Telenet investment in mobile technology ▪ Combine the strengths of a mobile and a fixed company	▪ No price and technology squeeze ▪ Full product flexibility ▪ Ability to start with latest mobile technology: HSPA, LTE,… ▪ Maximal EBITDA margin
▪ Dependency on other operator remains: technology choices, … ▪ No pricing flexibility ▪ EBITDA margin higher than MVNO but lower than MNO	▪ Late market entry ▪ Relatively large investment, but lower than M&A activity ▪ Time-to-build

Femtocell over cable, a research & development project

- Technology:
  - **Small, in-home base station for 3G mobile services**
  - **Connects directly to a cable modem or is integrated in a cable modem**
  - **Works with regular 3G-enabled handsets**

- Objectives
  - **QoS requirements on EuroDocsis cable networks to support Femto traffic**
  - **Feasibility of seamless handover**
  - **Investigation of RF interference**
  - **Analysis of femtocell in-home 3G coverage**

DVB-H and Mobile TV

- Telenet participated in extensive DVB-H trial project
- Trial showed significant consumer interest in mobile TV if:
  - **On the move**
  - **Personal TV at home**
  - **During live events (sports games)**
- DVB-H already successful in other countries:
  - **3Italia > 700,000 subscribers**
  - **All operators having deals with broadcasters**
  - **Product offers between €3 – 59**
- Our vision on mobile TV:
  - **On-demand and interactive services are essential components**
  - **Will require economically interesting access to mobile 3G networks**
  - **DVB-H license conditions still unclear**

Public broadcaster is selling tower real estate

telenet

- Terrestrial analog switch-off date in Flanders is November 3, 2008
- Digital dividend spectrum consists of DVB-T and DVB-H muxes (7 muxes in total)
- Public broadcaster (VRT) currently owns broadcast transmission towers, suited for DVB-T/H, to be sold before DVB-T/H licenses are awarded
- The main infrastructure asset consists of 7 high towers (300m)
- Telenet is interested in this terrestrial broadcast infrastructure given the opportunities it offers for DVB-H
- Investment analysis exercise is currently ongoing
- Bid submission date is early summer

Part 9

Operational long-term projections & Strategy

Agreement-in-principle with the PICs

Current legal procedures

Procedure	Expected outcome by
Appeal summary proceedings	Jun, 2008
Suspension procedure Council of State	Jun, 2008
Annulation procedure Council of State	2009
Procedure on the merits	2010
Administrative procedure with Government Commissioner / Minister	No intervention given short-term procedures

Belgian soccer rights

- Due date for submission offer: May 16, 2008
- Decision pending following the appeal by Belgacom against decision Competition Council
- Uncertainty around scope of offer (exclusivity or not)

Outlook full year 2008 reiterated

	Outlook 2008
Organic Revenue Growth	5% – 6%
Organic EBITDA Growth	6% – 8%
Capital Expenditures[1]	€180 – €190 m

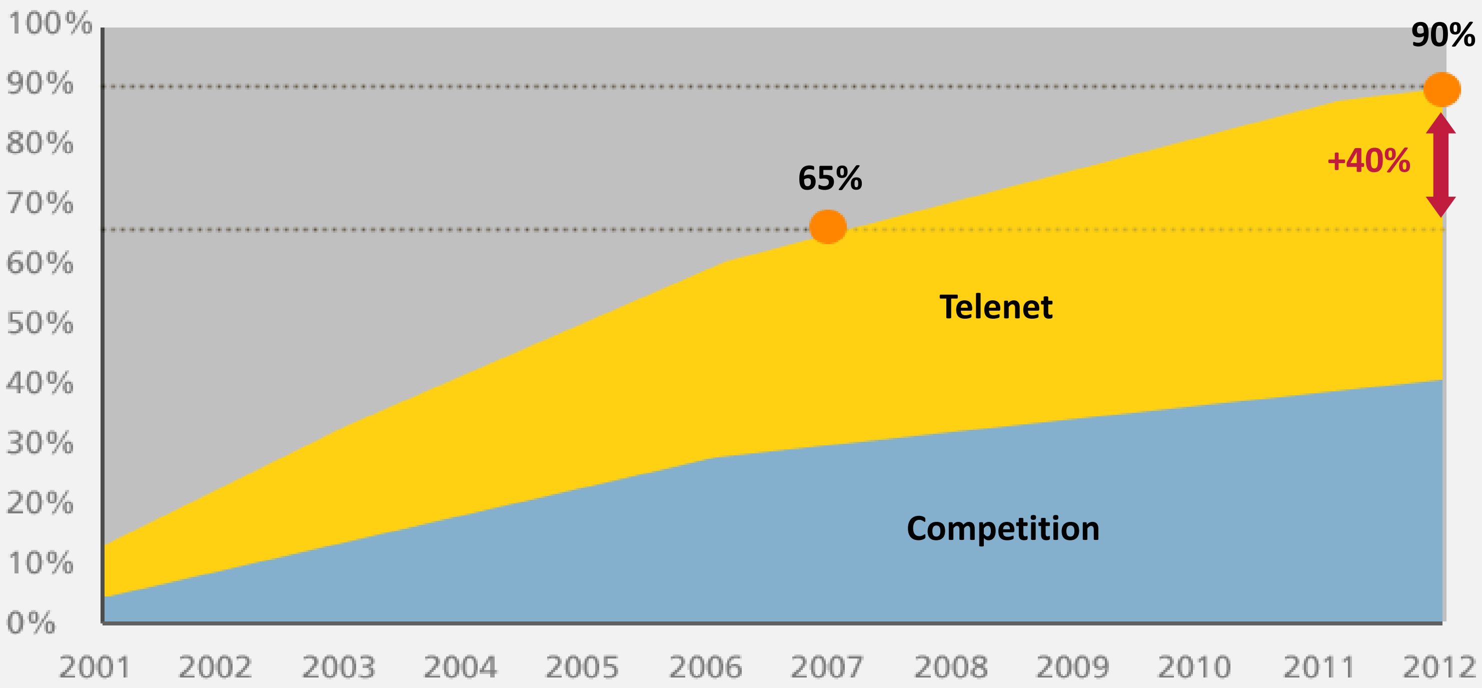
[1] Excludes up to €30 million of capex supporting set top box rentals

Broadband internet

Growth of c.40% subscribers ahead

telenet

Total broadband market in Flanders



Broadband internet
Long-term estimations and projections

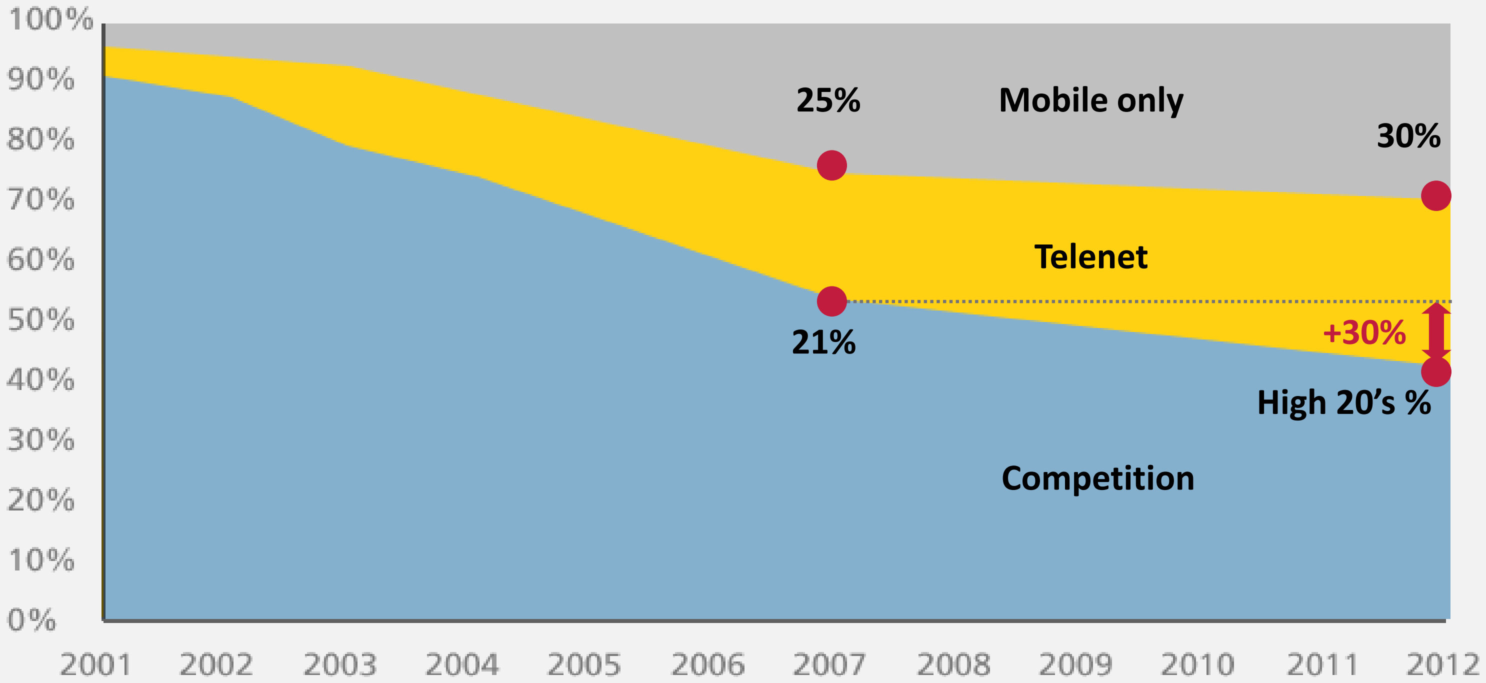
telenet

	2007	2012
Subscribers	▪ EOP: 883,000 ▪ Broadband penetration rate: 63%	▪ EOP: c.1.2 million ▪ Broadband penetration rate: c.90% ▪ Assuming stable market share evolution ▪ Over 5 years on average 70,000 net additions
ARPU	▪ 80% mid- and high-tier customers ▪ ARPU evolution fairly stable	▪ c.60-65% mid- and high-tier customers ▪ ARPU to reduce by low to mid-single digit percentage yoy

Fixed telephony

Long-term estimations and projections

Total telephony market in Flanders



Fixed telephony

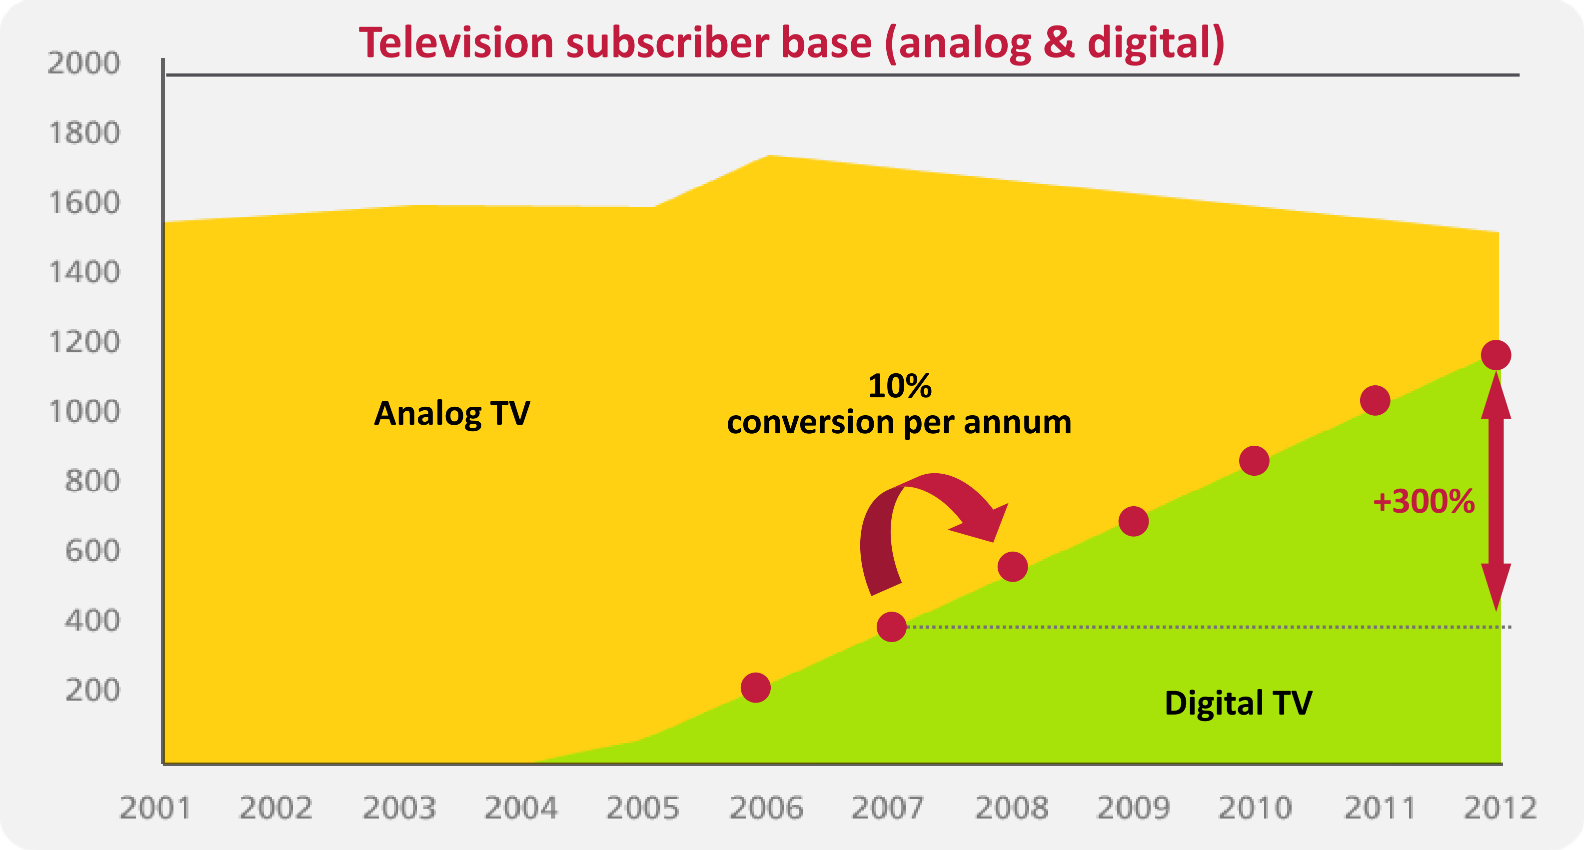
Long-term estimations and projections

telenet

	2007	2012
Subscribers	▪ EOP: 548,000 ▪ Fixed telephony penetration on homes passed: 21% ▪ Mobile only households: c.25%	▪ EOP: c.0.7 million ▪ Fixed telephony penetration on homes passed: high 20's% ▪ Mobile only households: c.30% ▪ Over 5 years on average 33,000 net additions
ARPU	▪ 83% flat fee customers ▪ ARPU reduced by high-single digit percentage yoy	▪ c.90% flat fee customers ▪ ARPU to reduce by mid- to high-single digit percentage yoy

Digital TV

Growth of c.300% subscribers ahead



Digital TV
Long-term estimations and projections

telenet

	2007	2012
Subscribers	▪ EOP: 391,000 ▪ Digital TV penetration on homes passed: 21% ▪ Digital TV of total cable TV: 23%	▪ EOP: c.1.2 million ▪ Digital TV penetration on homes passed: 65% ▪ Digital TV of total cable TV: 80% ▪ Over 5 years on average 165,000 net additions
ARPU	▪ ARPU evolution fairly stable ▪ Majority of ARPU component are subscription related (Prime/Thematic)	▪ ARPU to remain stable ▪ Composition of ARPU will change: substitution of subscription by usage and rental

Our revenue opportunity

telenet

	Key characteristics	Our positioning	Growth
Digital TV	Strong growth ahead as product becomes a commodity	Product innovation and superiority	+++
Broadband internet	Bandwidth is key in the ongoing digitalization of our lifestyle	Capitalize and enforce our leadership on the internet market by adopting to customer's needs	++
Fixed telephony	Attractive, cheaper and reliable alternative to mobile	Cross-sell telephony on top of broadband and TV	+
Mobile telephony	Steady growth, limited margin	Look for mobile options; cheap add-on in bundle	++

PLUS: LEVERAGE ON EXISTING SUCCESS

- High cable penetration
- Fully upgraded network
- Leading and innovative products
- Compelling bundles
- Strong focus on opex and capex efficiencies

Our margin opportunity

telenet

	Digital TV	Broadband internet	Fixed telephony
ARPU	=	-	- -
